

Power over Ethernet

Description

The PE1 is a Power-over-Ethernet (PoE) with integral 12VDC, 12 Watt power supply. It provides 12VDC power for one PoE-equipped device by "Injecting" DC power through the CAT5 or CAT6 Ethernet cables .

It is compatible with Access Points and other equipment supporting the IEEE standard PoE pinout and the 12VDC power requirement.

Specifications

AC Input	220V-50Hz
Power Output	12V-1A
Product Color	White
Material	ABS
weight	145 gr
Operating Temperature	0°C~40°C
Ethernet	10/100/1000T RJ-45 female
